## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 16-21, drawn to a method for treating piston skirts and a piston made by such a method, classified in class 123, subclass 193.6.
- II. Claims 7-15 and 22-30, drawn to a method for treating an engine block cylinder bore and an engine block bore made by such a method, classified in class 123, subclass 193.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a piston, and invention II has separate utility such as an engine block cylinder. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3747
